Hello Scouts and Scout Leaders!

Every school year the Waubonsie Valley High School Planetarium offers scout programming. As part of the scouting experience, scouts study the sky. So the WVHS Planetarium has created both programs and workshops to help scouts.

SKY MAP PROGRAMS

The Sky Map Program is a general program for boy and girl scouts of all ages. The program includes how the sky works, how to read a star map, and where to locate visible planets. Scouts will practice using star maps in the planetarium, and take them home to use in their own backyard. The main goal of this program is help guide scouts through the night sky.

Reservations are required. Program is 45 minutes. Admission is \$1 per scout and \$2 per adult. Schedule is available online.

***NEW* SCOUT WORKSHOPS**

Workshops are created to fulfill requirements for scouting achievements. Scouts participate in activities, crafts, night sky demonstrations, etc. Workshops currently offered include the [Space Explorer Try-It Workshop for Brownies](#), [Space Elective Workshop for Bears](#), and an [Astronomy Workshop for Boy Scouts](#). **Admission is \$5 per participant. Reservations are required.**

Program length varies.

Please see the planetarium's website for further details, schedules, and to make reservations.

Thank you for your support of the WVHS Planetarium!

Keep Looking Up!

Stephanie Gove, Planetarium Director
